

Forward

This document is intended to assist the music educator in delivering a language-relevant music curriculum to French Immersion students in the primary/elementary grades.

Building upon the background, rationale and contexts for teaching and learning of the authorized provincial K-6 music curriculum, this support document matches each grade level organizer with pedagogically sound resource materials in French.

Originally crafted for music educators of French Immersion students, a portion of its content is also easily accessible to music educators and students in the English stream.

Music teachers are asked to please note the following. Given that this document was developed for French Second Language programs, the Melody/Pitch organizer has been crafted in keeping with a movable 'doh'.
