Circular

To: All Consultants
Re: Chlorination System Specifications
Date: November 1, 2002

A number of chlorination specifications have been submitted for approval using the method of listing an approved product with the clause "or approved equal".

We feel that this does not provide sufficient competition as the listed product has a significant advantage over possible equals.

To improve competition the department will require consultants submitting specifications to list at least three systems that are acceptable products.

The consultant should specify that the chlorination equipment will be supplied by a single manufacturer or authorized representative for single system responsibility. It would also be advisable to ensure an authorized service/spare parts outlet is located in the province.

Your anticipated cooperation in this matter is appreciated.

A handwritten signature in blue ink that reads "Wayne Churchill".

WAYNE CHURCHILL, P. ENG.
Assistant Deputy Minister
Engineering Services
