TO: Municipalities, Local Service Districts and Consultants

RE: Master Specification Clarification

DATE: July 17, 2019

Please note that drawings 04020, 04030 and 04040 show the pay limits only for the bedding as specified. Supplier requirements may require additional bedding so that warranties are not voided which should be accounted for by the contractor and included in the works as part of normal construction operations (and incidental to the construction).

Section 02223, Item 1.1.13 to be changed to read: "When separate payment is specified or indicated in the Schedule of Quantities and Prices for granular materials for pipe bedding and backfill, measurement widths and lengths shall be as specified in the appropriate Master Specification drawing 04020, 04030 and/or 04040. Measurement depth shall be actual depth installed up to limits shown in the Master Specification drawing. Bedding volumes shall be adjusted in accordance with Section 02702, subsection 1.2.7 and Section 02713, subsection 1.4.10."

This will be reviewed during the 2019 construction season and revised as required for the following construction season.

Sincerely,

Kim Kieley, P. Eng., FEC
Director (A)
Infrastructure and Waste Management
